Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.138(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 5-22, 28-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Murphy (US Patent 7,037,310). Murphy discloses an instrument for implanting a prosthetic into a selected portion of a body having all the elements as disclosed in the claims including, but not limited to, at least a prosthetic engaging portion (115/120), a graspable portion (135), a rotatable torque transfer system (r) that is independent of the graspable portion, and wherein a first axis intersects a second axis (see axes drawn in Fig. 1) and portions of the instrument extend along each, and wherein the engaging portion is operable to engage and disengage a prosthetic via the torque transfer system (see Figs. 2A and 2B). Murphy also discloses an intermediate portion (also considered as a clearance portion) between the graspable and implant-engaging portion (see area Q in fig. 1) that is angled and would create increased visibility to the surgeon. The torque transfer system is also at least partially housed and provides a rotational torque. Rotating this torque allows the implant to be unscrewed (via threads) and detached from the system, allowing the system to engage and disengage. Portion 110, is also considered strikeable.

Response to Arguments

Applicant's arguments with respect to claims 1-2, 5-22, 28-35 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
